TESTERS' FLEX RATING 6

Light hearted, twin-tipped freestyle board. Perfect for jibbing, small jumps and getting to grips with the park. 'Nice shape and sidecut, although chatters a bit at speed...Solid feeling...easy to ride switch'. Hardcore freestyle monkeys may find the stance options limited. Flexible, easy, but it chatters a bit.

TESTERS' FLEX RATING 5

A solid all-rounder. Holds an edge relatively well although a bit skittish at speed and soft over hard, icy conditions. Pop was good and was stable on rails although stance options were limited. Perfect for playing around on rails and boxes and in the summer slush. A soft and fun summer jib stick or entry level cruiser.

DCMT FLEX RATING 6

An all mountain charger, go hard or go home. Stone ground sintered 7200 base for speed, hardwood edge support for enhanced edge hold and biaxial carbon accelerated weave for response. A stiff board that was manageable and fun.

OPTION Forecast

It's tempting just to write BANG! and leave it at that, but you lot deserve better. Happily, the banging graphics reflect the banging tech that's been poured into the Forecast, resulting in a high performance twin tip board that'll give the savvy shredders all they need to go bigger and faster. Name any kind of freestyle and this mother will own it - parks, rails, back-country, the lot - thanks to the poppy carbon laminates, speedy stoneground sintered base and lightweight Flight 2 wood core. Bang. Bang. Bang.
